Webcast Live Stream Video Conference

International Audio Visual

622 Route 10 West, Unit #21
Whippany, NJ 07981

Tel: 973-887-7744

VirtualEventsNJ.com

Webcast

IAV can *Live Stream* your next event. Our professional technicians will set up all the Audio & Video equipment needed for your company meeting or special event at your facility and Broadcast the presentation to other members of your organization. This can be done utilizing a public domain or our private & secure Content Delivery Network (CDN).

All participants will have *Real-Time* viewing of your presentation. The Live Video Stream can be accessed from a Computer or most Mobile Devices via the Internet. Authorized personnel will receive a pre tested Link via email with detailed instructions. A custom Registration Page can be created for participant information. Viewers may also submit questions using a Live Feedback window or Email.

Upon completion of your event we can provide you with a Post Event Survey and Analytics of your viewers. Your event can also be archived for future viewing, especially for those who missed the Live Stream or for training purposes.

Webcast vs Video Conference?

IAV is often asked this question by our clients. A Webcast would be one Presentation going out to many Viewers. A Video Conference would be a two way Interactive Conference between two or more locations.

Live Streaming

IAV Studio

IAV knows that sometimes choice of location can be difficult. That is why we offer all these services at our Studio in Morris County. We have redesigned our facility for Live Events to include a Webcast Control Room, Presentation Room for Live Broadcasts, as well as, our Video Production Suite. Please visit our facility by appointment and we can discuss your needs.

Special accommodations can be made in advance such as, catering for full day sessions and office services with free Internet Access. There is easy access to our facility and free parking at all times.

IAV can produce a Live Broadcast either in our studio or at a location of your choice or we can pre-record the event and broadcast it On-Demand. Your Program can include Slides, Pics, Pre-Recorded Videos, Remote Guest Appearances, as well as a Live Presenter/Emcee. Our technicians will also assist you in preparing your media package.

Global Connection!

IAV also has a Worldwide Network of Video Conference Rooms available for you to choose from if a private Far Site is needed. We are also available 24/7 for Overseas Calls in different Time Zones of the World. We can calculate and coordinate the schedule for all.
